Overview

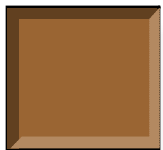

- The GLWC IDF allows you to pre-wire POTS, T1 and DS3 directly over the banks of co-locate cabinets, eliminating the need to do a home run each time your customer needs one or more of the 3 types of circuits

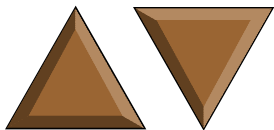

Features

Specs

Price List

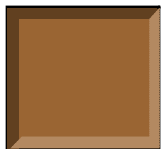

Features & Benefits

- The IDF is designed to mount easily to the ladder rack via a specially designed unistrut and doesn't take up any valuable real-estate.

T1 Special Cap Cable

Features

Specs

Price List

- Great Lakes Wire & Cable, Inc. has developed a special T1 cable perfectly suited to wire to and from the IDF. It's 2X construction allows you to pull just one cable because the transmit and receive are isolated under one jacket.
- Pull one cable instead of 2 ABAM's.
- Each 1/2 of the pairs has it's own color coded shield for easy identification of the TX and RX pairs.
- Comes in various pair counts from a 2pr individual shielded to a 56pr (2x28pr).
- Consult with your GLWC Sales Representative for additional information on pair counts and specifications.
